TIXOSIL®

Residual Pesticide Statement

Solvay USA Inc., certifies that Tixosil® brand synthetic amorphous silica (SAS), products do not contain residual pesticides.

Although Solvay does not routinely analyze for the presence of pesticide residue, pesticides are not intentionally added during the manufacture of these products. Synthetic amorphous silica is inorganic and not of animal or plant origin, therefore residual pesticides are not reasonably expected to be present.

Please note that this information, based on our expertise shall not constitute an additional specification and shall not be binding between the parties.

Warmest regards,

Judy D. Johnson
