 SHEMBERG BIOTECH CORPORATION Carmen Cebu Gums Industrial Zone Cogon West, Carmen, Cebu, Philippines 6005	Document No.:	FSP-1501
	Section:	15
	Revision No.:	7
	Effective Date:	July 20, 2023
	Page No.:	1 of 1
Type of Manual	Food Safety Plan	
Process	Management of Food Safety Concerns	
Title	Control of Allergens	

Raw materials used in the manufacture and blending of Shemberg carrageenan are potential source of allergens and cross-contamination. Therefore, part of the supplier approval and raw –material-risk assessment procedures shall assess raw materials for the presence of allergens and the potential for contamination.

Raw material specifications must be agreed with each raw materials supplier and include the allergen status (both content and risk of cross contamination) of the materials.

Shemberg shall require all raw material suppliers to provide an Allergen Information. This shall be obtained through the use of supplier questionnaires.

Only raw material seaweed has a potential source of crustacean allergen. Preventive Controls for the removal of crustacean allergen potentially carried by the raw material seaweed are strictly implemented. Seaweed raw material must be stored separately away from the standardizing agents and packaging materials. Crustacean levels of seaweeds must be monitored at least once every two (2) years.

Eating is only allowed at the canteen area. Bringing of food to the production area is strictly prohibited.

Allergen awareness orientation is provided to all employees once every year.

Documentation:

Allergen Information Declaration from Supplier

Attendance during the orientation

Validation Study of Raw Material Seaweeds & Work In-Process for Crustacea Allergen
