  - b. “and screened for metal particles after the package is sealed” If the ingredient in final form does not pass through metal detection, or only passes through an in-line metal detector (or x-ray) then change “after the package is sealed” to an accurate description.
  - c. Enter each type of foreign material control device (whether or not it is listed as a CCP or PC in the tables. Filters, sifters, magnets, x-ray, vision systems, metal detectors or any other unique foreign material detection device should be should be included. List the style of any magnets (plate, hump or grate)
