

*From Field to Family™*

January 2024

To Whom It May Concern:

You have asked about the presence of residual solvents in Grain Processing Corporation's MALTRIN® products. The only solvent used in manufacturing MALTRIN® is water. **No other solvents are present**, including the residual solvents listed by the USP Chapter <467> shown below.

<u>Class</u>	<u>Quantity</u>
Class 1	None Present
Class 2	None Present
Class 3	None Present
Other Residual Solvents (table 4)	None Present

This is based on knowledge of the manufacturing process and controlled handling, shipping, and storage of the material. There is no potential for specific toxic solvents to be present and the material, if tested, will comply with established standards.

Sincerely,

Joseph R. Glenn  
Quality Assurance Manager  
Grain Processing Corporation  
1600 Oregon St.  
Muscatine, IA 52761
