Heavy Metal Statement for MALTRIN® Corn Syrup Solids

Grain Processing Corporation (GPC) is a processor of yellow dent corn to make the following products: MALTRIN® corn syrup solids. GPC does not knowingly add heavy metals (including lead, mercury, arsenic and cadmium) in the manufacture of these products. Testing is done on random lots on a yearly basis. The historical testing indicates these products will meet inorganic impurities of NMT 0.1 ppm of lead outlined in Food Chemical Codex (FCC) for Glucose Syrups, Dried.

Glucose Syrup, Dried obtained from corn starch, is commonly designated dried corn syrup or corn syrup solids.

Please do not hesitate to contact GPC, if you need additional information.
