Care Chemicals

Dear Valued Customer:

FDA Food Additive Compliance Status Determination of BASF product Trilon NA Food Grade USA:

172.120 Calcium disodium EDTA May be safely used in designated foods for the purposes and in accordance with the conditions prescribed in paragraph (b)(1) and (b)(2). Please consult the regulation for specific use limitations in the desired application.

175.105 Adhesives

176.150 Chelating agents used in the manufacture of paper and paperboard

176.170(b)(2) Components of paper and paperboard in contact with aqueous and fatty foods

176.180 Components of paper and paperboard in contact with dry foods

177.1220 Cellophane §178.3570 Lubricants with incidental food contact For use only as a chelating agent and sequestrant at a level not to exceed 0.06 percent by weight of lubricant at final use dilution.

Please note that only specific indirect food contact applications are included in this statement. Further information is available on request

F o r n o t i c e: Appropriate processing conditions have to be applied when processing the product. The suitability of the product for the application concerned, including their effect on smell and taste of the food, and observance of any given limitations (for example overall migration, specific limits and other analytical requirements) must be tested and ensured in each case by the person who places any finished food contact article on the market. The product must not be used in any medical device and/or pharmaceutical applications.

This statement and any information provided herein does not constitute a legally binding obligation for BASF and is provided for your guidance only. All information contained in this document is given in good faith and is based on sources believed to be reliable and accurate at the date of publication of this document.

THIS STATEMENT EXPIRES 18 MONTHS AFTER THE DATE OF ISSUE or in case of regulatory changes before such date. Please ask for a new confirmation if needed.
