## RT00013 Titanium Dioxide Prop 65 Statement

- Titanium Dioxide supplied by Roha USA LLC is food grade manufactured and does not use nanotechnology.
- Nanomaterial means a natural, incidental, or manufactured material containing particles, in an unbound state, whereas 50% or more of the particles are in the number size distribution, and one or more external dimensions is in the size range 1nm – 100 nm
- Titanium Dioxide contains nanoparticles at up to 2% (100nm). These nanoparticles are naturally obtained during the manufacturing process e.g. grinding.
- When assessing the risk of these nanoparticles it has been determined that there is no health or environmental hazard as the nanoparticles are present at no more than 2%.
- Only Titanium Dioxide of respirable size nanoparticles is considered a Prop 65 substance, therefore RT00013 Titanium Dioxide is not a Prop 65 substance.

Sincerely,

Matt Crabtree
