TO WHOM SO EVER IT MAY CONCERN

GMO Statement

DL Malic Acid, which is manufactured by Thirumalai chemicals, is chemically synthesized and by implication can't therefore be genetically modified, and is GMO free.

DL Malic Acid is not enzymatically derived. There is no plant and animal derived additives used whatsoever in the manufacture of this Food Acid.

The starting point for DL Malic acid is Maleic acid, which on heating with water at higher temperature and pressure, converts to DL Malic Acid.

Nowhere in any of these processes are any additives or any genetically modified derivatives used.
