RE: Presence of Gluten – INEOS Glacial Acetic Acid

This is in response to your recent inquiry concerning gluten in INEOS Glacial Acetic Acid.

The ingredient listing for the Glacial Acetic Acid sold by INEOS is as follows: acetic acid (minimum 99.85% pure) and water (less than 0.15%). All other components are a direct result of the manufacturing process and make up less than 0.05% of the product.

No known allergens or allergen derivatives such as wheat and gluten substances, peanuts, soy/soybeans, milk, eggs, fish shellfish/crustacea, tree nuts or sulfites have been added during the formulation or used in the manufacture of this product. Further, the raw materials are inherently gluten free and processed in a manner which maintains that status.

I trust that this information addresses your concerns. If you have any questions, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Zach P. Drerup". The signature is fluid and cursive.
