RE: Halal Statement – INEOS Glacial Acetic Acid

This is in response to your recent inquiry concerning whether Acetic Acid is Halal.

The acetic acid sold by INEOS Acetyls which is manufactured by Eastman is made by the methanol carbonylation and/or methyl acetate carbonylation process; this is the same process used by other leading acetic acid producers, and it is the primary process used today to make acetic acid. It is synthetic; the raw materials used are carbon monoxide and methanol and are not of animal or biological origin. Acetic acid does not contain alcohol, additives of an organic nature, animal fats, animal by-products or any products of animal origin, and therefore, in our opinion, meets the requirements to be considered Halal.

I trust that this information addresses your concerns. If you have any questions, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Zach P. Drerup". The signature is written in a cursive, flowing style.
