Preservative Statement

ADM does not add any preservatives, bleaching agents, artificial flavors, pigments or dyes to any of the following products:

CornSweet® High Fructose Corn Syrup
Corn Syrups
CornSweet® Crystalline Fructose
Clintose® Dextrose
Clintose® Maltodextrin
Clintose® Corn Syrup Solids
Fibersol®- 2 (Digestion Resistant Maltodextrin)
Fibersol®- 2 AG
Versadex Dextrose Greens
Clinton Food Starch
Invert and Sucrose

All of the products listed above are free of preservatives. This would include sodium benzoate and benzoic acid. Sulfiting agents are used as a processing aid early in the wet milling process, but through the various refining steps in the process, the level in the finished product is reduced. No sulfiting agents are used in the sugar refining process.

If you have any questions, please do not hesitate to contact us.

Global Food Safety Initiative Statement (GFSI) ADM Corn Processing

Auditing has been used to validate and test the integrity of our quality systems. Our systems utilize a variety of avenues, which include internal GMP/Food Safety, system, and customer audits to accomplish these tasks. The Corn Processing Division made the decision to pursue FSSC/ ISO 22000: PAS 220, which falls under the umbrella of GFSI. Our current status at each location is as follows:

Marshall, MN currently has the official GFSI certificate on file.

Cedar Rapids, IA currently has the official GFSI certificate on file.

Clinton, IA currently has the official GFSI Certificate on file.

Columbus, NE currently has the official GFSI Certificate on file.

Decatur, IL currently has the official GFSI Certificate on file.

ADM recognizes that our commitment to quality, and the description of how it is enacted within our organization, is what our customers seek long term. We kindly ask for your patience as we make this transition and to be compliant with customer's immediate needs, we will provide the most current information on file.

Furthermore, if there are any questions regarding the status of any of these locations, please do not hesitate to ask.

Sulfites Statement

In the corn wet milling process, sulfur dioxide is employed in the steeping and process water. Residual sulfur dioxide levels of our products follow:

Clintose® Dextrose	3 ppm maximum
CornSweet® Crystalline Fructose	< 10 ppm maximum
Clintose® Maltodextrin	< 10 ppm
Clintose® Corn Syrup Solids	< 10 ppm
Fibersol®-2 (Resistant Maltodextrin)	< 10 ppm
Fibersol®-2AG	< 10 ppm
CornSweet® 42 High Fructose Corn Syrup	3 ppm maximum
CornSweet® 55 High Fructose Corn Syrup	3 ppm maximum
Corn Syrups	≤ 40 ppm
*Invert & Sucrose	<10 ppm

Low SO₂ products are available.

*No sulfiting agents are used in the sugar refining process.

If you have any questions, please do not hesitate to contact us.

Phone: 217/451-7602
Fax: 217/451-7574

For Sales and Marketing contact information, please see below.

TO WHOM IT MAY CONCERN:

This is in regard to your request for "natural certification" for **Clintose® Dextrose, Clintose® Maltodextrin, Fibersol-2™ Resistant Maltodextrin, CornSweet® Crystalline Fructose, CornSweet® High Fructose Corn Syrup, and Corn Syrups**. There is no formal definition for the term "natural" except as it is defined for "natural flavors" under 21 CFR 101.22. As an ingredient not fitting the definition of a "flavor", we can state the product is certainly not artificial, imitation, or synthetic and that the carbohydrate dextrose is both abundant and commonly found in nature. Additionally, it is our understanding that FDA is not restricting the use of the term natural except as it applies to 21 CFR 101.22.

To Whom It May Concern:

The EPA regulates the types of pesticides that may be employed on corn and has published a list of approved pesticides. We purchase corn on the open market that may or may not have been treated with these approved materials.

ADM does not apply any pesticides on the corn that we process. There are no detectable pesticide residues in ADM corn sweetener products.

TO WHOM IT MAY CONCERN:

Recall/Traceability Programs:

ADM Corn Processing tests internal traceability once a year on each product line, at each facility. The exercise(s) are designed to test both internal traceability and the recall/withdrawal programs. The standards followed are 100% recovery for both internal tracing and recall/withdrawal programs. The recovery goal is within 4 hours for internal traceability and 1 hour for detailing product shipped to market. The times will vary slightly depending upon the given scenario.

This year's results were within ADM's established criteria.

Regards,

Douglas A. Wolber
Director of Quality
ADM Corn Processing

Brent.Flickinger@adm.com

February 20, 2015

The safety and security of our world's food and feed supply chain is of utmost importance to responsible participants in that chain. Archer-Daniels-Midland Company ("ADM") exists for the purpose of serving vital needs for food and energy. We connect the harvest to the home and transform crops into products that serve those needs. That purpose necessitates attending to the safety and security of our supply chain. ADM offers this letter to inform its business partners of its commitment to the safety and security of its processes and products and to compliance with regulatory requirements designed to protect the world's food supply.

ADM is continually reviewing and improving its food safety systems and procedures, including its good manufacturing practices and implementation of programs such as hazard analysis and critical control point (HACCP). ADM regularly evaluates its facilities, processes and procedures to assess the risk of contamination of its products. A variety of safeguards and security concepts are utilized to reduce that risk. With respect to ADM's delivery network, we track rolling stock and barges and have secure areas for storage of fleets where ADM products are being held. Bulk containers for food service are inspected prior to loading and procedures for the sealing of certain empty bulk containers are in place to reduce the possibility of contamination of a container, such as a trailer, railcar or barge, while being returned for the next load. Procedures for sealing loaded containers help ensure that all openings are properly sealed and those seals are tracked to maintain integrity of the vessel to its destination.

Considering risks of unexpected events, such as global terrorism, natural disasters or global pandemic outbreaks, ADM recognizes the importance of business continuity and supply chain resilience planning. ADM maintains a Crisis Leadership Plan and has engaged in, and is committed to, initiatives to ensure a safe and stable supply of products to our customers. Examples of these efforts include ADM's active participation in the U.S. Department of Homeland Security's Customs-Trade Partnership Against Terrorism Program, an international supply chain security program, and our Pandemic Planning Task Force, a strategic planning group focused on the unique safety, security and business continuity concerns presented by the potential of a pandemic disease.

With respect to ADM's information technology, proper recovery procedures are in place to allow ADM's commercial activities to resume within a reasonable period of time in the event of a disaster. These off site data center procedures have been reviewed, enhanced and tested to ensure that information relating to the business of ADM and its business partners is protected. Established disaster recovery procedures will allow ADM to continue operations, including supplying and servicing its customers, with minimal interruptions.

The U.S. Public Health Security and Bioterrorism Preparedness Response Act of 2002 requires registration with the U.S. Food and Drug Administration ("FDA") of facilities that manufacture, process, pack, or hold food for human or animal consumption in the United States. Additionally, the Food Safety Modernization Act requires re-registration by December 31, 2012 and biennial thereafter. All covered ADM facilities are registered and ADM has procedures to assure that those registrations are properly maintained. ADM also has procedures in place to assure we meet regulatory requirements regarding record keeping by registered facilities. The Global Trade Compliance section of ADM works with key managers, customs brokers and carriers involved in importing to implement systems and procedures for compliance with the prior notice regulations issued by the FDA and to develop a flow of information that continuously ensures a timely and efficient transfer of data.

ADM's Code of Conduct recognizes the Company's obligation to follow applicable laws and regulations in every aspect of its business. Specifically, it has been and will continue to be the intent of ADM to fully comply with the regulations issued pursuant to the Public Health Security and Bioterrorism Preparedness Response Act ("Bioterrorism Act").

Occasionally, we are asked to provide registration numbers issued to ADM facilities registered under the Bioterrorism Act. Due to security concerns and advice issued by the FDA, ADM will not disclose those registration numbers, which the FDA has declared as beyond the reach of Freedom of Information Act requests. Provision of those numbers would, in our estimation, be unwise because of concerns that it could allow access to information that should be treated as confidential. However, if a customer needs confirmation of registration of specific facilities, that confirmation can be provided upon request.

Sustainability is a priority for ADM as it serves vital needs globally. Supplying our customers and the markets they serve with responsibly grown agricultural products is an operational priority at ADM. Sustainably produced crops and products reduce the impact to the environment and benefit the communities where we live and work. ADM actively participates in internationally recognized certification schemes to support sustainable agriculture worldwide. For example, ADM participates in the Roundtable for Responsible Soy, the Roundtable on Sustainable Palm Oil, the International Standard for Carbon Certification and more to support the development and implementation of sustainable agriculture.

ADM is committed to supplying its customers with safe, high-quality products. If you need additional information regarding the issue of product and process protection at ADM, please feel free to communicate with your service or technical contact or with Product Quality, Regulatory and Scientific Affairs which can be reached by phone (217) 451- 4880, by email (ProductQRSA@adm.com) or by facsimile (217) 451-2248.

Conflict Mineral Declaration

In July 2010, the United States Securities and Exchange Commission adopted the Dodd-Frank Reform and Consumer Protection Act (herein referred to as the “Act”). This Act requires U.S. companies to disclose, on an annual basis, whether any “Conflict Minerals” are necessary to the functionality or production of any of their products (see §1502 of the Act). A “Conflict Mineral” is considered to be any of the following minerals or their derivatives originating in the Democratic Republic of the Congo (the “DRC”) or any of the adjoining countries with which the DRC shares a recognized international border:

- Tin (cassiterite)
- Tantalum (columbite-tantalite)
- Tungsten (Wolframite)
- Gold

ADM complies with all national and other applicable laws and regulations. We are committed to keeping our supply chain free from conflict minerals which are covered by laws and regulations concerning the sourcing of minerals from conflict areas.

Based on currently available information, ADM does not use conflict minerals originating in the Democratic Republic of the Congo and its adjoining countries.

Pesticides Statement

ADM’s Corn Business unit employs an ongoing pesticide monitoring program to ensure there are no detectable pesticide residues found in our finished products as listed below.

For products where corn is the primary raw material, corn is sourced through regional grain distribution systems, regulated by the USDA. The EPA regulates the types of pesticides that may be employed on corn, and has published a list of approved pesticides. Corn that is purchased on the open market may or may not have been treated with these approved materials. ADM does not apply any pesticides on the corn that we process.

RE: Code of Conduct and Ethics

Thank you for your recent inquiry. Archer Daniels Midland Company is committed to integrity in the conduct of all its business affairs and has implemented an integrity program to ensure achievement of this commitment. Attached, please find a copy of ADM's Business Code of Conduct and Ethics implemented by ADM and distributed to its employees. In this Code, ADM employees are informed of the objective to operate ADM's business in accordance with the highest ideals of character and business conduct. In addition, the Code states our policy to abide by the national and local laws of the countries in which we operate. ADM is committed to operating its business in accordance with all applicable laws and regulations, including those relative to environmental protection, food safety, labor and individual employee rights. We hope this material will satisfy your company that ADM is committed to integrity in its business.

Because of the values and integrity program that ADM has itself implemented, it has determined that wholesale acceptance and adoption of values and principles from other companies is inappropriate and would elevate form over substance. Therefore, ADM requests that you accept this information as confirmation that our company meets the criteria you have set for your Company's suppliers and to serve as a substitute for acceptance by ADM of your Code of Conduct.

Regards,
