Storage and Shelf Life Information for Product Codes 015810, 015820, 015830 and 015840

Storage

Clintose® Dextrose in bags should be stored in a clean and dry area. Normal warehouse conditions are suitable. Conditions of 25°C and 50% relative humidity are preferred. Avoid double or triple stacking pallets to minimize caking tendency due to pallet compression.

Shelf Life

Shelf life is indefinite and dependent upon the intended application's sensitivity to "warehouse set" or "caking" common to sugars.

Under recommended storage conditions, product quality will not change from condition at receipt. If stored in recommended warehouse conditions, the shelf life will be better than two years. In less than recommended storage conditions, ADM represents a reduced shelf life on bags of Clintose® Dextrose product, and therefore the shelf life cannot be determined.

DX-651-130211 LB

For customers around the world, ADM draws on its resources—its people, products, and market perspective—to help them meet today's consumer demands and envision tomorrow's needs.
