The safety and security of our world's food and feed supply chain is of utmost importance to responsible participants in that chain. Archer-Daniels-Midland Company ("ADM") exists for the purpose of serving vital needs for food and energy. We connect the harvest to the home and transform crops into products that serve those needs. That purpose necessitates attending to the safety and security of our supply chain. ADM offers this letter to inform its business partners of its commitment to the safety and security of its processes and products and to compliance with regulatory requirements designed to protect the world's food supply.

ADM is continually reviewing and improving its food safety systems and procedures, including its good manufacturing practices and implementation of programs such as hazard analysis and critical control point (HACCP). ADM regularly evaluates its facilities, processes and procedures to assess the risk of contamination of its products. A variety of safeguards and security concepts are utilized to reduce that risk. With respect to ADM's delivery network, we track rolling stock and barges and have secure areas for storage of fleets where ADM products are being held. Bulk containers for food service are inspected prior to loading and procedures for the sealing of certain empty bulk containers are in place to reduce the possibility of contamination of a container, such as a trailer, railcar or barge, while being returned for the next load. Procedures for sealing loaded containers help ensure that all openings are properly sealed and those seals are tracked to maintain integrity of the vessel to its destination.

Considering risks of unexpected events, such as global terrorism, natural disasters or global pandemic outbreaks, ADM recognizes the importance of business continuity and supply chain resilience planning. ADM maintains a Crisis Leadership Plan and has engaged in, and is committed to, initiatives to ensure a safe and stable supply of products to our customers. Examples of these efforts include ADM's active participation in the U.S. Department of Homeland Security's Customs-Trade Partnership Against Terrorism Program, an international supply chain security program, and our Pandemic Planning Task Force, a strategic planning group focused on the unique safety, security and business continuity concerns presented by the potential of a pandemic disease.

With respect to ADM's information technology, proper recovery procedures are in place to allow ADM's commercial activities to resume within a reasonable period of time in the event of a disaster. These off site data center procedures have been reviewed, enhanced and tested to ensure that information relating to the business of ADM and its business partners is protected. Established disaster recovery procedures will allow ADM to continue operations, including supplying and servicing its customers, with minimal interruptions.

The U.S. Public Health Security and Bioterrorism Preparedness Response Act of 2002 requires registration with the U.S. Food and Drug Administration ("FDA") of facilities that manufacture, process, pack, or hold food for human or animal consumption in the United States. Additionally, the Food Safety Modernization Act requires re-registration by December 31, 2012 and biennial thereafter. All covered ADM facilities are registered and ADM has procedures to assure that those registrations are properly maintained. ADM also has procedures in place to assure we meet regulatory requirements regarding record keeping by registered facilities. The Global Trade Compliance section of ADM works with key managers, customs brokers and carriers involved in importing to implement systems and procedures for compliance with the prior notice regulations issued by the FDA and to develop a flow of information that continuously ensures a timely and efficient transfer of data.

ADM's Code of Conduct recognizes the Company's obligation to follow applicable laws and regulations in every aspect of its business. Specifically, it has been and will continue to be the intent of ADM to fully comply with the regulations issued pursuant to the Public Health Security and Bioterrorism Preparedness Response Act ("Bioterrorism Act").

Occasionally, we are asked to provide registration numbers issued to ADM facilities registered under the Bioterrorism Act. Due to security concerns and advice issued by the FDA, ADM will not disclose those registration numbers, which the FDA has declared as beyond the reach of Freedom of Information Act requests. Provision of those numbers would, in our estimation, be unwise because of concerns that it could allow access to information that should be treated as confidential. However, if a customer needs confirmation of registration of specific facilities, that confirmation can be provided upon request.

Sustainability is a priority for ADM as it serves vital needs globally. Supplying our customers and the markets they serve with responsibly grown agricultural products is an operational priority at ADM. Sustainably produced crops and products reduce the impact to the environment and benefit the communities where we live and work. ADM actively participates in internationally recognized certification schemes to support sustainable agriculture worldwide. For example, ADM participates in the Roundtable for Responsible Soy, the Roundtable on Sustainable Palm Oil, the International Standard for Carbon Certification and more to support the development and implementation of sustainable agriculture.

ADM is committed to supplying its customers with safe, high-quality products. If you need additional information regarding the issue of product and process protection at ADM, please feel free to communicate with your service or technical contact or with Product Quality, Regulatory and Scientific Affairs which can be reached by phone (217) 451- 4880, by email (ProductQRSA@adm.com) or by facsimile (217) 451-2248.

Current Good Manufacturing Practices Statement

This is to certify that the products listed below are manufactured following Current Good Manufacturing Practices (cGMP) as defined in 21 CFR 117s.

All Products

Alcohol-Beverage, Fuel and Industrial Grade	Maltodextrin (Clintose®)
Allulose (JustSweet™)	Potassium Citrate
Citric Acid Anhydrous	Propylene Glycol
Corn Syrup-Liquid and Solids	Resistant Maltodextrins (Fibersol®)
Corn Starch-Food and Industrial Grade	Sodium Citrate-Anhydrous and Dihydrate
Crystalline Dextrose (Clintose®)	Sorbitol-Liquid, Dry and Non-Crystallizing
Crystalline Fructose (CornSweet®)	Sucralose (VivaSweet™)
Glycerin	Sucrose*-Dry, Liquid and Invert
High Fructose Corn Syrups (CornSweet®)	Sweetener Blends
Liquid Citric Acid-Food and Industrial Grade (Citrosol®)	Xanthan Gum (NovaXan™)
Maltitol Syrup	

**Sourced from sugarcane and sugar beets*

Feed Products

Citristim	Golden Synergy™
Corn Germ Meal	Liquid Gold
Corn Gluten Feed	Liquid Lysine
Corn Gluten Meal	L-Lysine HCl
Distiller's Corn Oil	L-Threonine
Distiller's Dried Grains with Solubles	Modified Wet Distiller's Grains
Golden Gluten	Proplex DY, T, Y

To Whom It May Concern:

Subject: ADM Pallets for Sorbitol products

Be advised that the ADM manufacturing and repacking facilities (Decatur, IL) for our Sorbitol products use new pallets that have been heat treated to ship product. Please note that the chemicals Tribromanisole and Tribromophenol are NOT used in the treatment of these pallets. The heat treatment stamp can be found on each individual pallet. The origin of the wood for these pallets is from North America.

We are happy to provide this information. If we can be of further assistance please contact our Technical Service office.

Sincerely,
ADM Technical Service
