

## IOI OLEOCHEMICALS

### Allergen, GMO and Preservatives Statement

#### Glycerine 99.7% USP

Glycerine 99.7% USP is produced at Acidchem International Sdn Bhd's facility at 2411, Lorong Perusahaan Satu, Prai Industrial Complex, 13600 Prai, Penang, Malaysia and is manufactured entirely from naturally occurring vegetable oil sources (palm oil). These particular oil sources do not contain genetically modified organisms (GMOs).

#### Glycerine 99.7% USP typically contains:

- 99.7% glycerol
- 0.2% water
- <0.1% impurities

No preservatives or additives are used in the manufacturing of above-mentioned product. While Glycerine 99.7% is derived from tropical oils (Palm oil) which may themselves be of allergenic concerns, the glycerine product itself is a highly processed and purified distillation product. As such, any protein residues in the crude oils are removed by such processing, thus removing the allergen.

No gluten/wheat, corn, dairy, egg, fish/shellfish, sulfites, yeast starch, MSG, peanut, other nut, rice, sugar, sodium or soy potential allergens are present in this product.

  
Joe Emuang  
Vice President
