are either manufactured by fermentation of glucose syrup derived from corn or further processing (e.g. neutralisation, esterification, agglomeration, coating, blending etc.). The products undergo several purification steps and are finally obtained in their highly pure form.

Based on the production process as well as on the type of raw materials used, we can exclude to the best of our knowledge that the above-mentioned products contain substances listed under Proposition 65 State Drinking Water and Toxic Enforcement Act (last update 29 December 2023). However, we do not specially test for these substances, except for heavy metals.

Heavy metals are regularly tested. Typical data are available on request.
