

MALTRIN® M180

Maltodextrin

DESCRIPTION

MALTRIN® maltodextrins are bland, minimally sweet white carbohydrate powders produced from corn of U.S. origin. They are products with varying length polymer profiles that provide a wide range of viscosity and solubility characteristics.

REGULATORY

MALTRIN® maltodextrins are generally recognized as safe (GRAS) as direct food ingredients at levels consistent with good manufacturing practices (21 CFR 184.1444). The correct labeling is “maltodextrin”, but all label declarations should be reviewed with appropriate legal counsel.

PACKAGING, STORAGE AND SHELF LIFE

- Packaged in: 50-pound net, multiwall paper bags that are individually shrink wrapped; 2,000-pound tote bags; 25-kilogram bags.
- Store under ambient conditions; protect from excessive heat and excessive humidity for extended periods of time.
- Under good storage conditions the shelf life should be a minimum of two years.
- MALTRIN® maltodextrins will remain stable, but may pick up moisture if stored in excessive humidity, so reevaluation for moisture is recommended after one year to confirm the product still meets desired specifications.

PRODUCT ATTRIBUTES

- Heated solutions at 60% solids remain clear
- Minimal contribution to viscosity at solids below 50%
- Easily dispersible
- Bland flavor

APPLICATIONS

- Source of energy for nutritional products
- Aids in spray drying flavors or other ingredients
- Carrier and dispersant for dry-blend mixes and seasonings
- Prevents sugar crystallization in confections, frostings and glazes
- Contributes to total solids in frozen desserts

LOT CODES

Lot codes can be interpreted as follows: The first alpha character represents the product, followed by the last two numbers of the year and then the Julian date. Numbers following the Julian date represent the product line and the lot of the day.

Example: M1310801: M = MALTRIN®; 13 = 2013; 108 = Apr. 18; 01 = first lot
