

January 2, 2015

To Whom It May Concern:

Subject: **Food Security**

Morton Salt, Inc. has implemented measures to assure the security and safety of its products at all applicable Morton locations. These are:

- A Crisis Management Team,
- Site security procedures to prevent uncontrolled access to our facilities by visitors, contractors, and vendors,
- Hazard Analysis and Critical Control Point (HACCP) programs in all food grade facilities,
- A recall procedure entailing coding, retrieval systems and regularly scheduled mock recalls.
- Required seals on all of our (1) outbound shipments in vans, trucks, containers, and railcars, and (2) inbound shipments of ingredients.

There are numerous other aspects to our security measures, but they are not available for public disclosure. Should you need more detail, please feel free to contact me or arrange a site visitation.

Please be assured that we continue to evaluate the adequacy of present systems, processes, and measures, and will take sufficient steps to ensure the safety and wholesomeness of our products.

Sincerely,

Eric D. Shirk
Director of Quality
Morton Salt, Inc.

The statement is valid for two years (2) from the date set forth above.

January 2, 2017

To Whom It May Concern:

Subject: **Residual Solvents/Organic Volatile Impurities**

According to chapter <467> in the U.S. Pharmacopoeia, "Testing of drug substances, excipients, and drug products for residual solvents should be performed when production or purification processes are known to result in the presence of such residual solvents. It is only necessary to test for residual solvents that are used or produced in the manufacture or purification processes."

There are no ICH Class 1, 2, 3 or other Residual Solvents utilized in the processing of Morton® USP Salt (Sodium Chloride). For this reason, we do not perform residual solvent testing nor list residual solvents on our COA.

GENERAL AND CONTINUING COMMODITY GUARANTY FOOD GRADE PRODUCTS

The undersigned, MORTON SALT, INC., a Delaware corporation with its principal place of business at 123 North Wacker Drive, Chicago, Illinois 60606, hereinafter referred to as "Seller," hereby GUARANTEES the articles specified on Exhibit A comprising each shipment or delivery hereafter made by the Seller to

<u>Tilley Chemical Company</u>	<u>Baltimore</u>	<u>MD</u>
(Company's name)	(City)	(State)

hereinafter referred to as "Buyer," or on the order of the above-named Buyer, as of the date of such shipment or delivery, to be:

- (a) not adulterated or misbranded or injurious to human health within the meaning of the Federal Food, Drug and Cosmetic Act, and all regulations and amendments thereto including the Food Additives Amendment, to the extent said Act is then effective and applicable, and that such articles are not articles which may not be introduced into interstate commerce under the provisions of Sections 404, 505, 512 of said Act;
- (b) manufactured in compliance with the requirements of 21 CFR 110 Current Good Manufacturing Practice in Manufacturing, Packaging, or Holding Human Food;
- (c) not in a misbranded package within the meaning of the Federal Hazardous Substances Labeling Act to the extent said Act is then effective and applicable;
- (d) in compliance with the requirements of the Poultry Products inspection and the Meat Inspection Act to the extent that such Acts are then effective and applicable; and
- (e) in compliance with and not adulterated or misbranded within the meaning of any identical or substantially similar state or municipal law on the subject, to the extent said law is then effective and applicable;

Provided, however, that where any articles are packed and shipped or delivered under Buyer's labels, Seller's liability under this Guaranty for any misbranding shall be limited to liability for the failure, if any, of the articles to conform to the labels furnished to the Seller by the Buyer.

Provided further, that in the event Buyer chooses to arrange its own pick up of bulk product, then this Guaranty shall be valid only while Seller has direct physical control of the product at the shipping facility.

The Seller further agrees to indemnify and save the above-named Buyer harmless against any expense which it may incur or damage which it may suffer by reason of the breach of such Guaranty provided, however, that Seller is promptly notified by Buyer of any claim made against Buyer by reason of an alleged breach of such Guaranty and is permitted, at its option, to deal therewith in pursuance of its own discretion and through its own representative.

This guaranty supersedes all previous guaranties and shall be valid for two (2) years from the date set forth below or until such earlier time as written notice of revocation thereof is given to the Buyer.

Effective Date: January 5, 2015

MORTON SALT

March 31, 2016

To Whom It May Concern:

The Heavy Metals test currently provided on Morton's Certificate of Analysis includes all types of heavy metals including Lead, Mercury, Cadmium, etc. If any one of these metals or a combination of these metals reaches the limit (2 ppm for food products) the product is not acceptable as a food product. Therefore, the Heavy Metals test is equivalent or has a lower allowable limit for lead than a lead test by itself. To ensure that the procedure detects lead as a heavy metal, each analysis is run against a standard of lead at 2 ppm. In each case, if the sample has less heavy metals than the lead standard, the product is approved and passes Food Chemical Codex and Codex Alimentarius.

MORTON SALT

January 4, 2016

To Whom It May Concern:

Re: **Quality Program**

This letter confirms that Morton Salt, Inc. has developed and implemented a Quality Program for its food grade products. Morton Quality delivers high quality products by excelling at continuous improvement and ensuring safe and legally-complaint products that meet or exceed customer expectations. Because of the proprietary nature of our processes, copies are not available for dissemination. Our program in place includes but is not limited to:

- Allergen Control Program
- Certificate of Analysis and Compliance
- Cleaning
- Control of Foreign Material
- Finished Product/In-Process Control
- Glass and Brittle Plastics
- Good Manufacturing Practices (GMP)
- Hazard Analysis Critical Control Point (HACCP)
- Internal Audits
- Nonconformance (NCR) Procedures
- Personal Hygiene
- Pest Control
- Preventative Maintenance
- Recall Program
- Record and Document Management
- Supplier Approval Program
- Traceability
- Training

Morton Salt's Quality Program may be reviewed during a plant visit with prior notice.

Sincerely,

Eric D. Shirk
