## Organic Statement

QCS 2.0

Rev 1

According to the USDA National Organic Program, salt cannot be certified as organic because salt is a mineral and not an agricultural product. As stated in 7 CFR 205.303(b)(1) and 7 CFR 205.304.(b)(1) "Water or salt included as ingredients cannot be identified as organic."

Morton Salt and Windsor Salt produce salts with and without anticaking agents. Salts produced without anticaking agents can be considered for use in organic products. Salts produced with anticaking agents can, in some cases, be considered for organic status. Contact Morton Salt at [TECHNICALDOCUMENTS@mortonsalt.com](mailto:TECHNICALDOCUMENTS@mortonsalt.com) for additional information.

Salts produced with tricalcium phosphate (calcium phosphate, tribasic) can be considered for organic status. Tricalcium Phosphate is an allowed synthetic for processed products labeled as organic or made with organic.

It is the customer responsibility to seek organic approval for the ingredients used in their product.

This statement is valid for three years from the date of issuance.

**Date of Issuance:** 01/02/2024

**Supersedes:** 01/02/2023
