To Whom It May Concern:

Re: HARPC Statement

All Food Grade ingredients manufactured by Grain Processing Corporation are manufactured in processes utilizing a HARPC (Hazard Analysis and Risk-Based Preventative Controls) system. The HARPC program also interfaces with FSMA and Current Good Manufacturing Practices (cGMPs) that are practiced at GPC. The Codex Alimentarius HACCP principles shall be used.

This system, along with the other prerequisite programs such as cGMPs, Master Sanitation Schedules, Standard Operating Procedures (SOPs), Pest Control, and Sanitation Standard Operating Procedures (SSOPs), are monitored both internally and by our customers, outside auditing services, and Regulatory Inspectors.

If you have any further quality questions, please feel free to contact your sales representative.

Sincerely,

Joseph R. Glenn
Quality Assurance Manager
Grain Processing Corporation
