

## 2023 NUTRITIONAL INFORMATION

### USP PRECIPITATED CALCIUM CARBONATE ViCALity®

Nutrient	Amount/100 Grams	Units
Calories	*1	kcal
Moisture	0.05	wt %
Protein	<0.1	wt %
Ash	98.4	wt %
Total Carbohydrate	**2	wt %
Total Fat	<0.1	wt %
Sodium	7.5	mg
Calcium	39,400	mg
Iron	32.1	mg
Potassium	7.6	mg
Added Sugars	None	mg
Saturated / Trans Fats	None	mg
Cholesterol / Dietary Fiber	None	mg
Vitamin D	None	mg
Magnesium	215	mg

\*1. Calories are calculated by adding multiples of fat, protein, and carbohydrates. It is anticipated that there are negligible calories in calcium carbonate.

\*\*2. Total carbohydrates are determined by subtracting moisture, ash, protein, and fat from 100%. It is anticipated that there are negligible carbohydrates in calcium carbonate.

Most of the above nutrients are not tested on a routine basis; the information on these nutrients was obtained from accredited laboratories using official AOAC methods, but is given as typical value only. Information on moisture, calcium, iron, and magnesium is based on an average analysis of the product. I hereby certify that the above information is correct and complete. If you have any additional questions, please feel free to contact me at (413) 662-9968.

Sincerely,

Parvin Golbayani, PhD
