To Our Customers:

Re: TSE/BSE Assessment – Precipitated Calcium Carbonate Coated Products

All ingredients in this product are considered naturally occurring minerals. The raw materials are mined from natural deposits and are processed by mechanical methods to produce the finished products. Where additives, which contain animal derived substances, are used, such additives are manufactured from animals slaughtered in the US and Canada.

If you have any additional questions, please feel free to contact me at (413) 743-6205.

Sincerely,

Anh D. Nguyen
