

The Dow Chemical Company
U.S.A.

Date: 4/28/2010

Effective Date: 1/1/2008

Genetically Modified Organisms (GMO)

Dow's Propylene Glycol USP/EP is manufactured from propylene oxide derived from synthetic hydrocarbons, and water from condensed steam, at high temperature and pressure in a closed process using dedicated equipment, without the use of additives or process aids. Furthermore, it is transported in sealed containers that are either dedicated to its use or that have followed a strict policy for limiting prior cargoes, to prevent contamination.

For these reasons, we confirm Dow's Propylene Glycol USP/EP does not contain, nor has it been manufactured at any stage with, genetically modified organisms (GMOs). This product does not require GMO labeling under EU regulations 1829/2003 or 1830/2003. With respect to pharmaceutical uses of Propylene Glycol USP/EP, Regulation 1830/2003, Article 2, section 2 reads:

"This Regulation shall not apply to medicinal products for human and veterinary use".

If you have any questions or require further information, please contact us via our web site at www.dow.com.

Sincerely,

Connie L. Deford

Director, Global Regulatory Affairs
The Dow Chemical Company
