To Whom It May Concern:

Re: Sodium Acetate GRAS Statement

Please be advised that Niacet Corporation's Sodium Acetate is produced from synthetic chemical raw materials.

Niacet Corporation is pleased to announce that Progusta Sodium Acetate is considered to be generally recognized as safe (GRAS) for its intended use, as such the quantity added to a food does not exceed the amount reasonably required to accomplish its intended purpose.

Brand name	Chemical name	GRAS status
Niacet Progusta SA	Sodium Acetate Anhydrous	GRAS/FS

FS Substances permitted as optional ingredient in a standardized food
GRAS Generally recognized as safe. Substances in this category are by definition, under Sec. 201(s) of the FD&C Act, not food additives. Most GRAS substances have no quantitative restrictions as to use, although their use must conform to good manufacturing practices. Some GRAS substances, such as sodium benzoate, do have a quantitative limit for use in foods.
GRAS/FS Substances generally recognized as safe in foods but limited in standardized foods where the standard provides for its use.

Please contact us if you have any further questions or require additional information.

Sincerely,

NIACET CORPORATION
