To Whom It May Concern:

Re: Pest Control Programs at Church & Dwight Sodium Bicarbonate Manufacturing Facilities

Both the Green River, Wyoming and Old Fort, Ohio facilities maintain pest control programs. The pest control program at the Old Fort facility is managed by Rose Pest Solutions. The Green River facility program is managed by Orkin.

Both programs have regular (twice per month) inspection of indoor and outdoor traps, insect light traps, potential means of ingress and harborage, and regular reporting and trending of results. Corrective actions are implemented as required.
