S. Michael Burchell

Sr. Director Global Corporate Quality

Subject: Non-GMO Statement - Sugarcane and Raw Sugar - BT Insect Resistant Varieties

January, 2024

To: All Domino Foods, Inc. Valued Customers:

In response to customer inquiries regarding the BT insect resistant varieties of sugarcane and the US Agricultural Marketing Service (AMS) proposal to add BT insect resistant varieties of sugarcane to the USDA's List of Bioengineered Foods (announced on July 21, 2022), please be aware of the following.

For more than 5 years, ASR Group has been committed to a non-GMO supply of raw cane sugar for our refineries and has required suppliers of raw sugar to assure us that they are not using or growing genetically modified (GM) or bioengineered (BE) sugarcane varieties. We are aware the BT insect resistant varieties of sugarcane are being commercially grown in the Center-South (CS) region of Brazil and that the North-East (NE) region of Brazil does not have any GM or BE sugarcane being grown.

ASR Group has traditionally sourced Brazilian raw sugar from the NE region. We recently announced a new partnership with Raizen, which is a major local sugar and ethanol producer in CS Brazil, the first fully traceable, segregated and non-GMO / non-BE certified raw sugar supply chain in the world. This means that ASR Group is now able to exclusively purchase non-GMO / non-BE certified raw sugar from CS Brazil.

In summary, ASR Group has not and does not intend to use raw sugar derived from BT insect resistant varieties of sugarcane.

We trust this information is sufficient. Should you require additional information, please feel free to contact us at QualityDocs-NA@asr-group.com.

Sincerely,

S. Michael Burchell
Senior Director Global Corporate Quality
for ASR Group

BRAND SUMMARY CERTIFICATE OF NON-GMO PROJECT VERIFIED PRODUCTS
