To Whom It May Concern:

Re: HACCP

Please be advised that HACCP Plans have been developed and implemented at the Church & Dwight Co. Inc. sodium bicarbonate manufacturing facilities located in Old Fort, Ohio and Green River, Wyoming.

The sole CCP at both plants is metal detection with limits set for ferrous, nonferrous and stainless steel at 2.5mm or less. Monitoring is constant and when levels are exceeded management / quality are notified. Verification takes place at the beginning of each shift. All data is recorded.

Feel free to contact me with any questions.
