Re: Shelf Life / Storage Conditions

To Whom It May Concern:

Please be advised that the Shelf Life of Niacet Corporation Acetate, Propionate and Stearoyl Lactylate products is generally considered to be indefinite. We do recommend a product retest after two (2) years from date of manufacture to ensure conformance to specification.

It is recommended that our Acetate and Propionate products be stored in a dry protected environment at ambient temperature. In addition to storing in a dry protected environment, we strongly recommend Stearoyl Lactylate products be stored below 80 degrees F (26°C) to avoid softening.

Sincerely,
Niacet Corporation
