Shelf Life for Sorbitol Solution, USP/FCC (Excipient/Food Use)

STORAGE GUIDELINES

Sorbitol Solution USP/FCC supplied in bulk tank trucks or tank railcars should be stored in stainless steel or FDA approved lined mild steel tanks equipped with ultraviolet sterile conditioning systems. The product should be stored above 70°F in order to prevent crystallization. If crystals have formed, the product may be returned to its normal state with heat and gentle agitation.

SHELF LIFE

Sorbitol Solution is chemically and microbiologically stable and the shelf life is indefinite for all practical purposes. However, experience has shown that the pH may drift down over time as this product has no buffering capacity; therefore, it is recommended that pH be re-tested on product after one year.

Product stored in vented tanks may decrease in water over time due to evaporation.

If you have any questions, please do not hesitate to contact us.

ADM Technical Services

SS-010-110908 JW

For customers around the world, ADM draws on its resources—its people, products, and market perspective—to help them meet today's consumer demands and envision tomorrow's needs.
