## Declaration of Non Genetically Modified Organism Status for Tallow Fatty Acids

The raw materials used in the manufacture of the following Vantage Oleochemicals' fatty acid products are not known to contain genetically modified (GM) materials. The production plant also processes some vegetable fatty acids some of which may contain genetically modified material. However there are change-over procedures within the manufacturing facility to prevent contamination. The tallow products have been tested to ensure no proteinaceous matter is present in them.
