### **BSE / TSE - FREE STATEMENT**

ICL Food Specialties (a division of ICL Performance Products LP) and ICL Fosfatos y Aditivos México S.A. de C.V. manufacture high quality food grade phosphates, phosphoric acid, and sulfates, which are high purity inorganic products manufactured from refined mineral raw materials. There are no animal-derived proteins, tissues, or other materials used in any part of the production of these food and/or feed ingredients. In addition, there are no animal-derived materials used in any other processes in our manufacturing facilities. Therefore, we can guarantee that we meet the current FDA regulations regarding the absence of bovine spongiform encephalopathy (BSE), or any other transmissible spongiform encephalopathy (TSE), with respect to the food and/or feed ingredients produced at our manufacturing facilities.

A handwritten signature in black ink that reads "Lori L. Klopf".
