### **GMO (Genetically Modified Organisms) STATEMENT**

ICL Food Specialties (a division of ICL Performance Products LP) and ICL Fosfatos y Aditivos México S.A. de C.V. manufacture high quality food grade phosphates, phosphoric acid, and sulfates, which are high purity inorganic products manufactured from refined mineral raw materials.

These inorganic products do not contain any components from plants, animals, or microorganisms. They are not derived from or manufactured with materials that are genetically modified. They conform to the current EU regulations on genetically modified food and feed (EU 1829/2003 and EU 1830/2003), and there is no EU labeling requirement for genetically modified organisms (GMO). Therefore, the absence of Genetically Modified Organisms can be guaranteed, and additional testing and Identity Preservation (IP) programs are not applicable.

A handwritten signature in black ink that reads 'Lori L. Klopf'.
