REACH COMPLIANCE STATEMENT

The European Union is actively moving forward in adapting its REACH regulations (**R**egistration, **E**valuation, **A**uthorization of **C**hemicals). Our affiliate company under ICL Performance Products, BK Giulini GmbH, has successfully registered and pre-registered all relevant substances of our products. Please note that only individual substances (with a defined CAS number) may be registered, and that mixtures / blends are not registered under this regulation. In addition, food and feed ingredients are exempted from REACH.

REACH registration Phase II ended on 31 May 2013, by which date the required product registrations were completed. (These REACH Reference Numbers are available upon request.) Further registrations are planned and will be completed during the third REACH phase for the 2018 REACH deadline. Most recently (June 2014), the ECHA published an update with additional listed Substances of Very High Concern (SVHC); it has been verified that none of our relevant products contain any of these new added SVHC substances.

This statement is a confirmation that ICL is well aware of REACH regulations and updates, and that we are currently in:

REACH Compliance for all of our products.

If there are any additional questions regarding REACH compliance, please contact me at the address above, or at email: Lori.Klopf@icl-group.com.

A handwritten signature in black ink that reads 'Lori L. Klopf'.

Lori L. Klopf, Ph.D.
