Lot Code Explanation

ACG Materials manufactures Terra Alba (Calcium Sulfate – Dihydrate) at the Bessie Milling facility located in Western Oklahoma. A lot code is issued for every 500 tons of material that is milled. The lot numbers are sequential and are independent from the date of production. The lot number and date of production are recorded in the mill production records.

All individual bags are printed with the lot number and the date of production on the bag. Bulk shipments have the lot and date of production on the Bill of Lading.

Should you have additional questions please call (405) 366-9500 or contact me via email at csisco@acgmaterials.com or customer service at csr@acgmaterials.com.

Best regards,

Cole Sisco
Sales Manager

Pesticide Policy

ACG Materials processes Calcium Sulfate Dihydrate at our plant located in Bessie, OK. At no point in the process of grinding and packaging of the food grade Calcium Sulfate Dihydrate is the product exposed to pesticides.

Effective measures shall be taken to exclude pests from the processing areas and to protect against the contamination of food grade calcium sulfate dihydrate on the premises by pests. The use of insecticides or rodenticides is permitted only under precautions and restrictions that will protect against the contamination of the food grade calcium sulfate dihydrate.

A professional outside pest control agent is engaged to monitor pest control activities at the plant.

Best regards,

Cole Sisco
Sales Manager
