RE: Shelf Life Statement, Calcium Sulfate Dihydrate or Terra Alba

Properly stored, ACG Materials' Terra Alba has a shelf life of one year from date of production. Storage requirements are a dry covered area with no extreme temperatures.

Fine grades of Calcium Sulfate Dihydrate may tend to cake due to compression during storage, but the lumping does not have an effect on the purity or functionality of the Calcium Sulfate Dihydrate.

Calcium Sulfate Dihydrate supplied by ACG Materials is tested daily by our lab for free as well as combined moisture and purity. An independent lab is used on every lot number to ensure compliance to the FCC, USP and NF. All samples are kept 2 years for any additional testing that may be required.

Should you have additional questions please call 405-366-9500, or contact me via email at csisco@harrisonsypsum.com or customer service at csr@alliedcustomgypsum.com

Best regards,

Cole Sisco
